## **DETAILED ACTION**

Claims 1-28 are currently pending.

Response to Restriction requirement filed 08/07/2006 is acknowledged. Applicant elected, without traverse, group I, claims 1,3,5-7,9,11-15 and hRPAP1 as species. Claims 2-6,8-10,13,16-28 are withdrawn from consideration as directed to non-elected groups or species.

Upon consideration of the elected claims 1,7,11,12,14,15, the following further restriction requirement was deemed necessary.

### **Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

IA. Claims 1,7,11, drawn to polymerase comprising catalytic and RNA-binding subunit.

IB. Claims 12,14,15, drawn to catalytic subunit.

The inventions are distinct, each from the other because of the following reasons:

Inventions IA and IB are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the

Art Unit: 1631

intermediate product is useful to make other than the final product, and the species are patentably distinct (MPEP § 806.05(j)). In the instant case, the intermediate product is deemed to be useful for, e.g., production of antibodies, and the inventions are deemed patentably distinct because there is nothing on this record to show them to be obvious variants.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
